MOBILE COMPACTOR: MAXIMIZE STORAGE, OPTIMIZE SPACE

Rolex India Engineering's mobile compactor system offers a space-saving storage solution for various applications, especially file storage.

Technical Specifications:

Highly Customizable: We offer custom dimensions (Height, Length, Depth) to perfectly fit your space and needs.

Durable Construction:

Superstructure: 22 Swg CRCA steel for robust support and longevity.

Partitions: 22 Swg CRCA steel for secure compartment separation.

Shelves:

Standard: 21 Swg CRCA steel, supporting up to 50-60 Kg UDL (Uniformly Distributed Load) per shelf.

Heavy Duty: Upgraded gauge steel available upon request to accommodate higher weight capacities.

Tracks: 25 mm thick for smooth and stable movement of the mobile units.

Trolleys: 2.5 mm thick for reliable support and load handling.

Advantages of Rolex India Engineering Mobile Compactors:

Space Optimization: Maximize storage capacity by utilizing vertical space efficiently.

Improved Organization: Easily access and manage your files with clear compartmentalization.

Enhanced Security: Secure your stored materials with lockable compartments and controlled access.

Increased Efficiency: Reduce wasted space and retrieval time compared to traditional shelving systems.

Adaptable to Various Needs: Customizable design caters to diverse storage requirements.

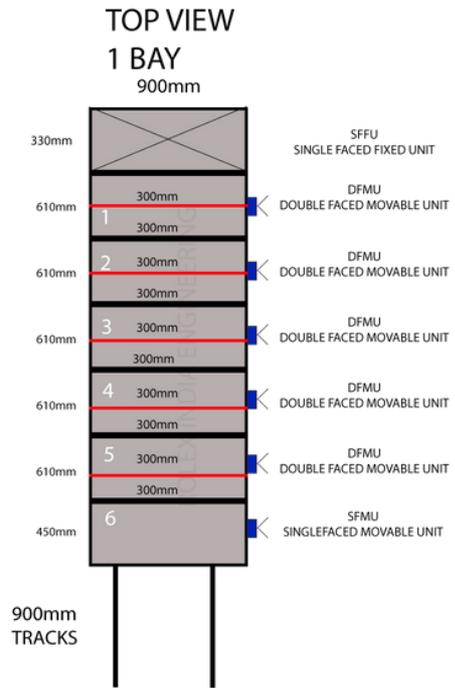

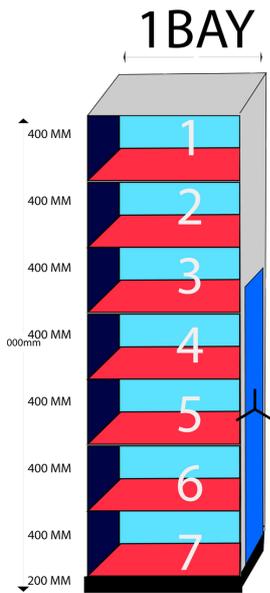

Durability and Reliability: High-quality materials and construction ensure long-lasting performance.

Expert Guidance: Our experienced team provides expert advice and support throughout the selection and installation process.

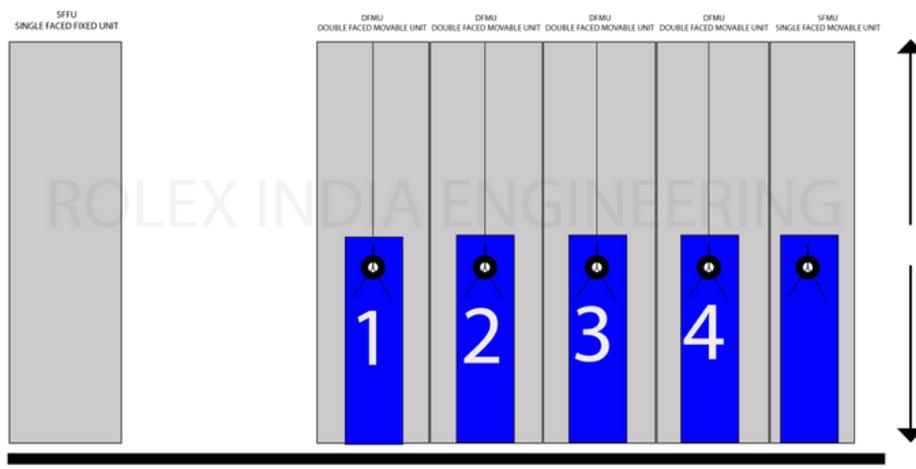

Invest in a Rolex India Engineering mobile compactor system and experience the benefits of space optimization, improved organization, and enhanced security for your valuable files and materials.

Information Required from Client for Mobile Compactor Installation

Space Details:

Dimensions: Please provide the Length (L) x Breadth (B) x Height (H) of the space where you intend to install the mobile compactor.

Room Layout: If possible, please share a drawing or sketch of the space, including any existing features like beams, pillars, windows, doors, and electrical outlets.

Clear Height: If there are any obstructions like beams, please specify the clear height available below the obstruction.

Pillar Locations: If there are any pillars in the room, please indicate their location (on the wall or within the space) and their dimensions.

Storage Requirements:

Box Files: If you plan to store box files, please specify the estimated number of box files you need to accommodate.

Other Storage Items: If you're not storing box files, please provide the following:

Weight per shelf: If using bins, specify the weight you intend to store on each shelf.

Product dimensions: If not using bins, provide the dimensions (L x B x H) of the products you plan to store.

By providing this information, we can ensure the mobile compactor system is custom-designed to fit your specific space and storage needs.
